The most versatile of Healing Lasers that offers world-class performance and affordability. Superior to Cold lasers that cost thousands of dollars more.

TerraQuant is a professional low level laser therapy (LLLT) device that is used in homes, clinics, hospitals and private practices in over 30 countries around the world for over ten years, and is finally available now in the US. Low Level Lasers such as the TerraQuant are called cold lasers because they don't generate heat and will never scorch or burn, making them extremely safe and easy to use. TerraQuant Lasers make laser treatments, pain relief and healing easy, fun, safe and affordable. It's more effective and more versatile than most other lasers that we have tested and it tends to provide quick results for the widest range of conditions.

The Only Laser to Provide 4 Healing Energies in One Device:

TerraQuant utilizes 4 healing energies that work synergistically together to create a quantum healing effect never before available. The 4 healing technologies include:

- Super Pulsed Laser Light in the 905 nm range with 25,000 mW and up to 5" penetration.
- Pulsed Broadband Infrared light (wavelengths 875 nm)
- Pulsed Red light (wavelengths 660nm)
- Negative North Permanent Magnetic Field (at 25-45 mT)
- Hertz frequencies from 5-3000 Hz/sec., all controlled by a microprocessor that super pulses the laser light at 10 millionth of a second for maximum penetration up to 5 inches.

† Doctor Edgar Mitchel writes:

“The problem of present-day medicine is that over centuries Western Scientific thought has been concentrated around a chemical model of organization and function of molecules, tissues and organs in our body. However, this biochemical model should be expanded to deeper levels by including electromagnetic and quantum processes that play a crucial role in self-organization of living nature.”

Quantum Medicine and Terra Quant

By Prof. Samuel Edelstein

Quantum Medicine (QM) is a medical methodology which incorporates therapeutic effects of different electromagnetic fields, such as pulse laser radiance, broadband infrared radiance, visible red light and static magnetic field, in order to transform living cells from an unstable state of illness into a stable healthy state. One striking common denominator in all the clinical cases that QM is effective is inflammation. The sequence of events at the tissue level, which leads to the pathological state of inflammation is reduced micro-circulation with changes in blood supply to the cells, resulting in ischemic injury. Any influence that will be able to shorten the duration of the ischemic state will have beneficial effect on the course of the disease and the accompanying pain.

The radiances mentioned above are capable, within a few hours after irradiation of the painful tissue, to improve the supply of oxygen to the hypoxic cells, to improve the microcirculation and to remove toxic waste products from the site. The tissue is rejuvenated and the pains disappear. All the above is achieved by chemical processes in the cells that are responsive to bio-photons. The molecules in the cells that are capable to respond, called chromophores, are porphyrines, enzymes with antioxidant properties, mitochondrial cytochromes and molecules of oxygen. Their response will result in renewed energy production (ATP) and restoration of all impaired cellular functions.
